74440 Covidien 601 Allendale Road King of Prussia, PA 19406	7590 01/08/2008		EXAMINER ANDERSON, CATHARINE L	
			ART UNIT 3761	PAPER NUMBER
			MAIL DATE 01/08/2008	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)
	10/617,218	GLAUG ET AL.
Examiner	Art Unit	
C. Lynne Anderson	3761	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 02 November 2007.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-19 and 34 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) Claim(s) _____ is/are allowed.
 6) Claim(s) 1-19 and 34 is/are rejected.
 7) Claim(s) _____ is/are objected to.
 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2 November 2007 has been entered.

Response to Arguments

2. Applicant's arguments filed 2 November 2007 have been fully considered but they are not persuasive.
3. In response to the applicant's argument that Imsangjan fails to disclose leg openings being of complementary shape, as defined by the present specification, it is noted that the present specification does not provide a clear and explicit definition of the term "complementary shape." The present specification generally describes a web being severed along a cut line to form two sections of complementary shape, but this description of the formation of the two sections does not constitute a clear definition of the term "complementary shape" as meaning only shapes that exactly match each other along their lines of curvature. While the two sections are described by the present specification as being complimentary shaped sections, absent a clear and explicit definition of the term "complimentary shape," the term must be given its broadest

reasonable interpretation. Therefore, any shapes that complement each other in their general appearance or functionality will be considered to fulfill the claimed limitations.

4. With respect to claim 34, in response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the concave and convex edge portions being formed from a single web of material cut along a single cut line) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). The claim limitation requiring the concave edge portion and the convex edge portion be shaped from a single cut line does not require that the concave and convex edge portions be formed from a single web cut along a single cut line. The present claim limitation is sufficiently broad that it merely requires each of the concave and the convex edge portions to have a single, continuous contoured edge.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

6. Claims 1-7, 16-17, and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dravland (4,906,243) in view of Imsangjan et al. (7,011,653).

7. Dravland discloses all aspects of the claimed invention with the exception of the front section having an S-shaped arcuate edge portion. Dravland discloses a disposable undergarment having a front waist portion 10c, a belly portion 14c, a rear waist portion 10a, a rear back portion 14a, and a crotch portion 10b, as shown in figure

4. The undergarment has a pair of leg openings, each leg opening having an S-shaped arcuate edge portion in the rear section 14a that forms a convex projection at the lower portion of the leg opening, as shown in figure 1.

8. Imsangjan disclose an undergarment having leg openings, each leg opening having an S-shaped arcuate edge portion in the front section, as shown in figure 4. The S-shaped arcuate edge portion help keep the garment in place during use and improve comfort, as disclosed in column 3, lines 19-48.

9. It would therefore be obvious to one of ordinary skill in the art at the time of invention to provide the front portion of the leg openings of Dravland with an S-shaped acruate edge portion, as taught by Imsangjan, to help keep the garment in place during use and improve comfort.

10. With respect to claim 2, Dravland discloses that each of the leg openings is elasticized by elastic threads 20 and 22, as shown in figure 1.

11. With respect to claim 3, the elastic threads 20 and 22 extend along the convex edge portion, through the intermediate edge portion, and into the front portion, which when modified by Imsangjan is the concave edge portion.

12. With respect to claims 4 and 5, a plurality of transversely extending elastic threads 18 extend through the waist portion, as shown in figure 1.

13. With respect to claim 6, the article comprises an absorbent core 14.

14. With respect to claim 7, the article further comprises an absorbent core 14 and insert sheet 16, and a gasketed compartment for absorption of liquids.

15. With respect to claim 16, the core 14 comprises absorbent material, as disclosed in column 2, line 1.

16. With respect to claim 17, the article comprises a fluid acquisition layer 16 disposed over the core 14, as disclosed in column 1, line 68.

17. With respect to claim 34, each of the concave and the convex edge portions of Imsangjan have a single, continuous contoured edge, and therefore fulfill the claimed limitation.

18. Claims 8-13 and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dravland (4,906,243) in view of Imsangjan et al. (7,011,653), and further in view of Otsubo et al. (US 2002/0151864).

19. Dravland, as modified by Imsangjan, discloses all aspects of the claimed invention with the exception of the placement of the elastic threads across the belly portion and the rear back portion of the article, and the crotch portion being a separate member. Otsubo teaches an article having elastic threads 23 and 24 extending across the belly portion and the rear back portion, as shown in figure 3. The crotch portion of the article is a separate member, as shown in figure 3. This configuration provides the article with a more secure and comfortable fit, as disclosed in paragraph [0006]. It would therefore be obvious to one of ordinary skill in the art at the time of invention to construct the article of Dravland with the elastic threads and separate crotch portion of Otsubo, in order to provide the article with a more secure and comfortable fit.

20. With respect to claim 18, the core 14 comprises absorbent material, as disclosed in column 2, line 1.

21. With respect to claim 19, the article comprises a fluid acquisition layer 16 disposed over the core 14, as disclosed in column 1, line 68.

22. Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dravland (4,906,243) in view of Imsangjan et al. (7,011,653), and further in view of Good et al. (5,843,056).

23. Dravland, as modified by Imsangjan, discloses all aspects of the claimed invention with the exception of the chassis comprising a nonwoven spunbond polypropylene. Good teaches the use of spunbond polypropylene as a suitable nonwoven material for the topsheet of an absorbent article, as described in column 5, lines 51-64. It would therefore be obvious to one of ordinary skill in the art at the time of invention to construct the article of Dravland with a nonwoven spunbond polypropylene, as taught by Good, to provide a suitable topsheet for the article.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Lynne Anderson whose telephone number is (571) 272-4932. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tanya Zalukaeva can be reached on (571) 272-1115. The fax phone
